CLIENT BRIEF / THE OPPORTUNITY

More revenue.
Same appointment schedule.

What happens when a practice fills its calendar,
but patients never make it through the door?

9,074	941	10.37%
Appointments reviewed	Recorded no-shows	No-show rate

THE BUSINESS PROBLEM

A booked appointment is not the same as a completed visit.
Missed appointments can leave staff and treatment capacity unused,
while a clinic still carries many of its operating costs.

THE QUESTION WORTH ASKING

Could a practice recover more completed visits from its existing schedule before spending money to attract more patients?

Historical physiotherapy dataset; illustrative DSA analysis.
Not a real client engagement or verified revenue recovery.

01 / APPOINTMENT PATTERNS

The missed visits are not evenly distributed.

Looking at the overall rate is useful. Looking at when visits are missed helps a practice decide where to investigate first.

APPOINTMENT HOUR	NO-SHOW RATE	MISSED
9 AM	6.31%	78
2 PM	12.54%	147
4 PM	12.31%	80
5 PM	18.11%	94

WHAT THIS DOES - AND DOES NOT - TELL US

5 PM had the highest substantive hourly no-show rate shown here. 2 PM had more missed visits in absolute terms. Neither proves why patients missed appointments or which intervention will work.

Historical appointment records. Rates rounded; the 12 PM hour had only one appointment and is excluded from this comparison.

02 / THE MONEY & NEXT MOVE

Start small.
Measure what comes back.

ILLUSTRATIVE 30-DAY REVENUE MODEL

750	8%	~14
Monthly bookings	Target no-show rate	Extra completed visits

SCENARIO ASSUMPTIONS

Baseline no-show rate: 10.37% | Recovery conversion: 80%
Revenue per additional visit: $100 | Variable visit cost: $60
Illustrative follow-up program: $250 per month

~$569	-$250	~$319
Visit contribution	Follow-up costs	Incremental benefit

RECOMMENDED 30-DAY TEST

1. Review reminders, confirmations, and rescheduling friction.
2. Pilot lower-cost follow-up for selected unconfirmed appointments.
3. Track no-shows, completed paid visits, staff time, and costs.
4. Compare with a suitable baseline; expand only if justified.

THE BOTTOM LINE

The opportunity is a better operating decision, not another dashboard.

Model figures are estimates, not actual recovered revenue or proven impact.
Financial results exclude other unmodeled expenses and uncertainty.
